

**2 GHz to 6 GHz, 44 dB Gain Broadband High Gain Amplifier with 1 Watt and SMA**

SBBA-060-44-01-SMA is a 1W wideband coaxial power amplifier operating in the 2 to 6 GHz frequency range. The amplifier offers 30 dBm min of P1db and high 44 dB minimal small signal gain with the excellent gain flatness of ±1.0dB max and an outstanding output IP3 performance of 39 dBm. This excellent technical performance is achieved through the use of hybrid MIC design and advanced GaAs PHEMT devices. The amplifier requires typically a +12V DC power supply. The connectorized SMA module is unconditionally stable and includes built-in voltage regulation, bias sequencing, and reverse bias protection for added reliability. The amplifier operates over the temperature range of -55°C and +85°C.
