Description

High Performance

The HyperLink brand model HGV-4958-06U is an economical yet high performance 6 dBi omnidirectional antenna designed for broadband frequency operation from 4.9 GHz to 5.8 GHz. Compact and lightweight, these antennas are ideally suited multipoint applications where wide coverage is desired.

Versatile and Economical

The HGV-4958 Series antennas feature an integral N-Female bulkhead type connector that can mount through the wall of an equipment enclosure. Also included is a mast mounting kit which consists of a heavy-duty steel bracket and a pair of U-bolts. This kit allows for installations on masts up to 2.0" in diameter.

All Weather Operation

Constructed for all weather operation, the HGV-4958 Series antennas feature sealed collinear brass elements inside a durable UV-stable machine gray fiberglass radome. A vented end cap and drain holes in the base help prevent moisture build-up inside the antenna. These features allow the antenna to be mounted in up or down positions.
