

**TACTICAL ANTENNA
ARA-243T**

The **ARA-243** is the smallest, sturdiest, and most lightweight, foldable yagi antenna available for UHF SATCOM Operations. The ARA-243T is a tactical tripod-mounted antenna.

The antenna is durable enough to be used in a harsh field environment and can be deployed by an operator several thousand times. The dull black anodized finish protects the antenna from the effects of weathering and does not produce a shiny glare. The ARA-243KT collapses into a small space making it the ideal size to fit into a briefcase or attaché to a rucksack. A smartly designed MOLLE compliant bag is included with each antenna.

A Pelican hard case is optional.

Specifications:

Gain	5 dBic
Frequency	240 to 318 MHz
Polarization	Right hand circular
Impedance	50 Ohms
VSWR	< 1.5:1
Operating Temperature	-30° to +70°C
Storage Temperature	-47° to +85°C
Power Handling	150 Watt CW, 250 Watts for 5 min
Antenna Connectors	Female, BNC type
Cables	Optional
Tripod with AZ and EL Mount	Included
Deployment Time	< 30 sec
Finish	Black(Default) or Tan
Weight	.95 lbs
