MTPA40125253532

400MHz-2500MHz 200Watt Broadband Power Amplifier

MTPA40125253532 is a air-cooled, broadband, solid state amplifier. This rack mount amplifier based on GaN technology provides high gain, high output power, wide dynamic range, and good linearity. The front panel gain control permits the operator to conveniently set the desired output level. The LCD display shows operate status including rack temperature, current, gain, and etc. Multiple self-protection techniques are implemented such as thermal overload, excessive current flow, Input overdrive, large mismatch, fan mal-function. The status indications are available via the LCD display accordingly. This unit is suitable in EMI/EMC test, satellite communication, RF/MW measurements, and other applications.

- High Power and Efficiency
- High Reliability and Ruggedness
- Ultra Broadband
- Built-in control, monitoring & protection circuits
- GPIB option -101
